Programme Note:

Having intermittently worked as a kit drummer since the late 1970s, counting and timing have long been of interest to me as a composer. After reading Giulio Tononi's *Integrated Information Theory (IIT)* of consciousness and Leibniz's *Pre-established Harmony and Causality*, I began to think of what Tononi calls, the "physical substrate of consciousness (PSC)" in relation to Leibniz's countable/rhythmic "monads". In other words, "rhythmic time lurks in the unknown and 'unthought' dimensions of experience" (Eleni Ikoniadou, 2020).

Composed in 2022, this piece marks an important stage in my LIE scalic PhD compositional research and larger-scale developmental in general. The Double Harmonic (or 15th Melakarta Raga) scale [1, 3, 1, 2, 1, 3, 1] is used as a generative source scale for this piece, which, ascending from E $\flat$ (with a silent axial 'A') = {E $\flat$, E, G, G $\sharp$, B $\flat$, B, D, E $\flat$ }. Discovering that this scale was also popularly known as, and harmonically equivalent to, the "Flamenco mode", inspired the inclusion of a classical guitar. Dittersdorf's Double Bass Concerto (1762) and Henze's Symphony No. 7 (1982–83) both informed the speed of semiquaver delivery in the bass and cello parts. With hindsight, I realised that Dukas's Sorcerer's Apprentice (1897) was also influential, albeit subconsciously.

"The musician feels mathematics, the mathematician thinks music"

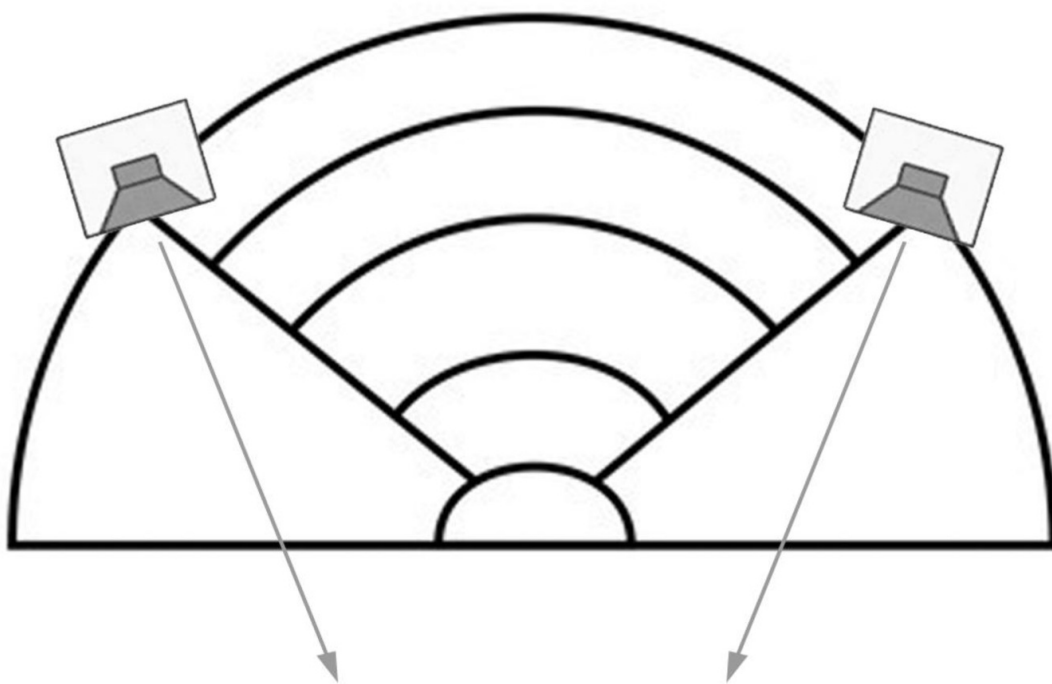

(James Joseph Sylvester)

Performance Notes for the Conductor:

Tempo = 124 BPM, scored in common time throughout

Synth part and click tracks:

The synth part might be either pre-recorded or aired in real-time using a Midi standard Mallet Synthesiser (Square Lead Expr.); Wav and/or Midi files are available by request. As the Synth track underpins the temporal coherence of this piece, it is recommended that the conductor uses an ear-piece click track. At the discretion of the conductor, the pianist, section leaders, timpanist, percussionists and others might also be provided with this. The synth track should be broadcast stereophonically with the stand-mounted PA speakers angled towards the centre of the auditorium and placed to the right of the percussionists and left of the trombones, as follows;

The volume of the synth part should be (as far as possible) in keeping with the relative dynamics of the following demonstrative audio file: <https://www.surrealism.co.uk/mp3/symph2-april-2023.mp3>

Other considerations:

Aside from adherence to tempo, there are no other specific instrumental techniques that require further explanation, as all notation falls within standard practise for the 21st Century.
